

February 14-16, 2008 - Stanford Linear Accelerator Center

SuperB Detector I

A workshop on design and R&D for a SuperB detector

The workshop will focus on the detector for the high luminosity $10^{36} \text{ cm}^{-2} \text{ s}^{-1}$ SuperB flavor factory. Particular emphasis will be placed on the R&D needed for detector subsystems, and on the development of a suite of software tools needed for simulation studies.
