

# SuperB III

THE THIRD WORKSHOP  
ON A SUPER FLAVOR FACTORY  
BASED ON LINEAR COLLIDER TECHNOLOGY

JUNE 14-16, 2006 – STANFORD LINEAR ACCELERATOR CENTER

A workshop on the design of a high energy collider, with luminosity of  $10^{36} \text{ cm}^{-2}\text{s}^{-1}$  using technology being developed for the International Linear Collider. The workshop will also study the capability of SuperB in  $b$ ,  $c$  and  $\tau$  physics and the demands on the associated detector.
